

DRIVE THRU SHELTERS

20' x 20' Shelter

Allows for one lane of vehicles allowing public health staff to work out of the elements.

30' x 30' Shelter

Can hold four vehicles for treatment in two lanes.

40' x 60' Shelter

Provides additional area for multiple cars within two lanes.

Features and Benefits

Drive-thru shelters are free-standing and erected with no center poles or obstructions. Drive-thru shelters create a convenient and quick way to provide necessary testing and/or medications in situations where the community needs to be treated efficiently and effectively. These shelters are designed to provide an economical solution for:

- Drive Through Health Testing
- Vaccinations
- Food & Supply Distribution
- Haz-Mat Operations
- Security Checkpoints
- Healthcare Overflow
