

LARGE SCALE WATER PURIFICATION

Part Number WA-WPFW1200

Sustain Critical Operations In Fixed Facility Or Field Operations

WESTERN SHELTER SYSTEMS

ISO 9001:2008 Registered Company

Key Features and Benefits

- Daily production capability of 28,000 gallons
- Hourly production capability of 1,200 gallons
- Designed to function in both fixed facility and field operations
- Rugged aluminum frame and compact size, it is lightweight and easily transported in a SUV or van
- UV dose exceeds 40mj/cm²
- Effective to 0.019 microns, ideal for hospital support such as dialysis and laboratories
- Produces microbiologically safe water for human consumption and food preparation

WA-WPFW1200 Specifications

Dimensions	40 x 24 x 32"	(1.0 x 0.6 x 0.8 m)
Cube	17.7 ft ³	(5.4 m ³)
Weight	150 lb	(68 kg)
Water Source	Fresh	
Purification Rate	20 Gallons per minute	(75.8 L)
Power	Recyclable	
Amperage	15 amps	
Standards	USEPA/NSF P248/P231
